EXAMINER'S AMENDMENT

An extension of time under 37 CFR 1.136(a) is required in order to make an examiner's amendment which places this application in condition for allowance. During a telephone conversation conducted on 29 May 2007, Christopher B. Austin requested an extension of time for 3 MONTH(S) and authorized the Director to charge Deposit Account No. 13-3080 the required fee of \$1020.00 for this extension and authorized the following examiner's amendment. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

The application has been amended as follows:

In the Claims

In claim 14, line 3, after "arm" insert --being a single, substantially flat layer of material and--, line 9, change "a wall" to ---the single layer--- and after "wiper arm" insert ---and extending to a terminus of the wiper arm---, line 12, change "the wall" to ---the single layer---.

In claim 23, line 2, after "free end" insert --the free end being a single, substantially flat layer of material--, line 7, change "a wall" to ---the single layer--- and after "wiper arm" insert ---and extending to a terminus of the wiper arm---, line 10, change "the wall" to ---the single layer---.

Reasons for Allowance

The following is an examiner's statement of reasons for allowance: The claims set forth a wiper arm not taught by the art of record. In particular, a wiper arm where the free end is a single, substantially flat layer of material which extends to a terminus of the wiper arm to define a safety hook. An articulation bolt extends from the single, substantially flat layer of the free end and resides between the safety hook and a non-free end of the wiper arm. The prior art wiper arms with safety hooks do not disclose such a wiper arm. The prior art employs multi-wall free ends for the wiper arm and do not have a free end where a single, substantially flat layer of material extends to a terminus of the wiper arm to define the safety hook. Further, the prior art do not provide the articulation bolt between the safety hook and the non-free end of the wiper arm.

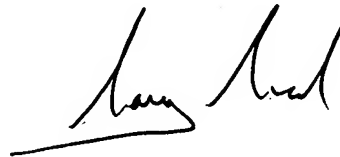

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Gary K. Graham whose telephone number is 571-272-1274. The examiner can normally be reached on Tuesday to Friday (6:30-4:00).
